

Resources Available From the University of Minnesota Extension Service

The University of Minnesota Extension Service has many available resources. The Onsite Sewage Treatment Program Team (OSTP) provides educational information to Minnesota residents. Our goal is to help communities and individuals find viable and affordable wastewater treatment that protects public health and the Minnesota environment.

Contact us at 800-322-8642 or septic@umn.edu or visit our web site at <http://septic.umn.edu>.

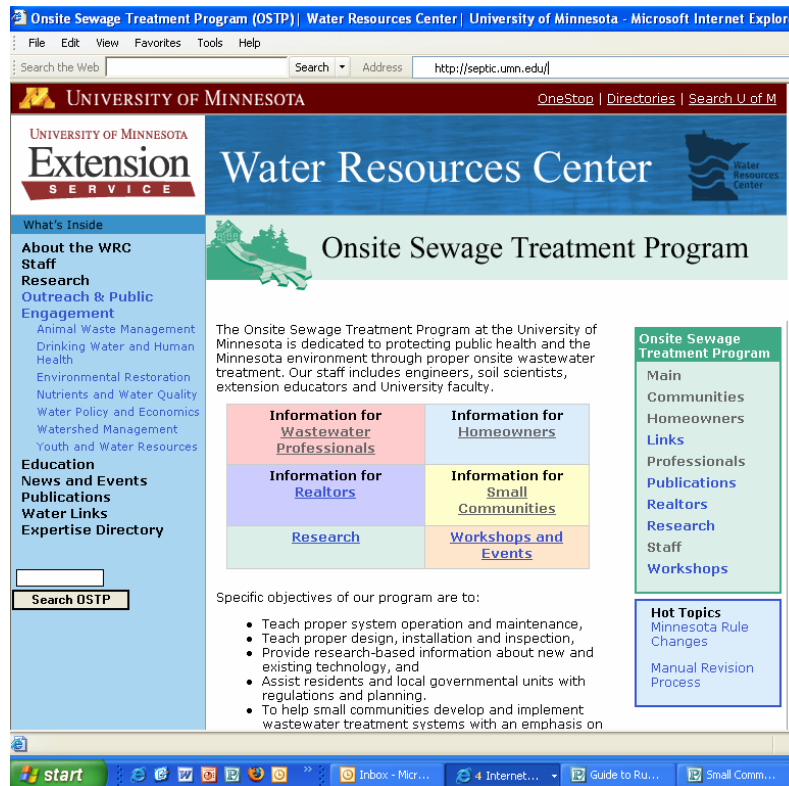

The Onsite Sewage Treatment Program web pages have a wealth of information for homeowners, small communities and septic professionals. Visit <http://septic.umn.edu> to learn about your septic system.

In the Homeowners section, find tips on freezing prevention, products to use (or not to use) in your home and much more.

The Small Community section has recently been updated. There are a vast number of resources available for communities as they work their way through the decision making process of establishing or upgrading community septic systems.

Check out the Professional section for information on courses for septic professionals and much more.

Or start with the Extension web site at www.extension.umn.edu, click on environment the Onsite Sewage Treatment Program. Then explore the rest of the Extension web site for a wealth of information.

The Lake Home & Cabin Kit, Second Edition not only answers more questions such as *how to start your septic system in spring and preparing it for the fall, what you should know about heating your home or cabin, and even how to create your own rain garden...* it also directs you to our programs, publications, and websites for more in-depth advice. Plus, the second edition is updated to include all current environmentally responsible practices that you need to know about as a property and lakeshore owner.

Call 800-876-8636 or go to <http://shop.extension.umn.edu>.
